On Purpose With Purpose

Service inventory

Prepared for Shronda | October 28, 2026. Based on recorded configuration and confirmed results in our project session. This is an inventory, not a fresh end-to-end check of every account.

Current services and tools

Service / tool	Role	Recorded status
IONOS	Domain and branded email	In use; email forwarding confirmed.
GitHub	Website code and PURPOSE source	In use; website and development work backed up.
GitHub Pages	Public website hosting	Recorded hosting setup; no deployment performed for this inventory.
Calendly	Consultation bookings	Connected on website; free 30-minute introductory consultation.
FormSubmit	Contact-form delivery	Submission received; automatic-reply delivery unresolved.
Outlook	Forwarded email inbox	In use; receives branded-email forwarding.
Ko-fi	Tips and support page	Setup underway; payment connection and exact public URL unverified.
Hive AI	AI responses for PURPOSE	Real connection tested successfully; 191 tokens used in connection check.
PURPOSE	Private brand assistant	Local CLI and browser dashboard built; proposals and approval controls.
Node.js	Runs PURPOSE locally	Installed and working in supplied Windows results.
Git / PowerShell	Local updates and project commands	Working; PURPOSE shortcut supports everyday dashboard access.

Other service decisions

Item	Status
Newsletter platform	Not selected or connected. MailerLite is excluded.
Google Analytics	Not configured; optional.
Tally	Removed from the contact page.
Social profiles	Facebook, Instagram, YouTube, TikTok and LinkedIn links exist; several remain generic placeholders. Exact brand URLs need verification.

Confirmed project addresses

Website: https://on-purpose-with-purpose.org

Branded email: shrondajeanine@on-purpose-with-purpose.org

Forwarding inbox: on-purpose-with-purpose@outlook.com

Calendly: https://calendly.com/shrondajeanine79/30min

GitHub repository: https://github.com/shrondajeanine79-gif/on-purpose-with-purpose

Boundaries and open items

MailerLite is not being used. Older MailerLite placeholders in website files are unfinished code, not an approved service choice.

A website connection does not give PURPOSE access to that service. PURPOSE cannot currently read contact submissions, send email, change bookings, charge customers, publish, or deploy.

One free introductory consultation per person; later paid appointments are arranged personally with Shronda. Repeat-booking enforcement and calendar conflict checking have not been verified.

No API keys, passwords, account billing details, or private credentials belong in this inventory.
